## **DETAILED ACTION**

### ***Response to Arguments***

1. Claims 1-2 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Bodager. Applicants argue that, with respect to the Bodager article, there is only a single image recorded within the article, and that the receivers of the present invention contains two images. Applicants, however, are not claiming an article wherein both layers are, in fact, printed. The examiner, moreover, interprets the phrase "recorded information" to mean any stored data, or any discontinuous coating which alters the optical property of the medium. In Bodager, the water-absorbing layer receives water and other liquid ink components. *See* col. 3, lines 56-60. Such a composition would alter the optical properties of the water-absorbing layer; consequently, it comes within applicants broad limitation of "recorded information."
